**IN**

**SPYDEBERG MUNICIPALITY**

**NORWAY**

**SPECIAL PROJECTS?**

**Gardening**

Just outside the Kindergarten all the groups have a small garden where they can grow potatoes, flowers and vegetables. This is to teach the children about nature and healthy food.

**Energy observation**

Every week the oldest children observe the weekly use of electric energy.

Then they discuss the result and consider how to use less energy the following week. This is done to teach the children how to take care of the nature.

**Out in the forest**

At least once a week all the children go to the forest. Here they can play, have their meals and learn about what happens in the nature. It is important to learn to appreciate and take care of it.

**No accidents here!**

The personal has made good routines for considering the children's safety and continuously think of improvements.

**Spring 2003:**

"Hallo to you!"

The personal is gathered at the childrens playground on a workshop day in order to make plans for the year to come..
